CHICKENS STOLEN

Thief Raided Poultry-House of Entertainment to Be Given on the

Policeman Warren has a record for raising good chickens, but he says that his neighbors raise as good chickens as he does, and that some of them have poultry coops which are far easier of access than his. The thief made the raid some time in the early morning, for the occupants of Mr. Warren's home were awakened then by noises in the chicken-house. The thieves left only a few chicks, and these had been hatched only a few days.

It is cultivated in that part of the world, inding most suitable conditions for its development from two miles to two and a half miles above the level of the sea.

The plant attains a height of about two feet, and is grown for the sake of its seeds, which are used as we utilize bushels of slaked lime per acre, and surged it evenly as possible ages, the contain as much nutriment as wheat does, in proportion to bulk, and the na-

"quinoa" is an all-important food plant. Recently our Government has been seeking in every out-of-the-way corner of the world for little known plants of value, with a view to introducing them to cultivation in the United States, and out of quite a number of such already found the "quinoa" seems to be one of the most desirable. It is, in effect, a the northern part of the great plains

The northern plains of the Middle West have a climate not very unlike that of the high levels in the Audes, to which the "quinoa" is a native. There is a similar dryness, with long and severe winters and correspondingly short summers. But it has also been suggested
